# RED FIRE DANGER INDEX

Fire Danger Index Values  
Fri 06 Oct 2023

INDICATIVE COLOUR	RED FDI Values = 76-100
FIRE BEHAVIOUR	Rates of forward spread of head fires can exceed 70 kilometres per hour and flame lengths will be in order of 5-15m or more.
FIRE SUPPRESSION DIFFICULTY	Any form of fire control is likely to be precluded until the weather changes. Back burning dangerous and best avoided.
DANGER RATING	<b>HIGH - EXTREME</b>
FIRE PREVENTION & PREPAREDNESS MEASURES	No fires may be allowed under any circumstances in the open air and Fire Protection Associations and municipal Disaster Management Centres must invoke contingency fire emergency and disaster management plans including extraordinary readiness and response plans. All operations likely to ignite fires halted. <b>All aircraft and teams on Standby.</b>
APPLICATION OF THE ACT	Section 10(1) (b) applies: no person may light, use or maintain a fire in the open air.
RELATIONSHIP WITH DISASTER MANAGEMENT	The threat of disastrous wildfires exists at municipal level under these conditions. Municipal Disaster Management Centres must invoke contingency plans and inform National and Provincial Disaster Management Centre. (Section 49 of the Disaster Management Act No. 57 of 2002.)

## AERIAL SUPPORT

For aerial support to be cost effective, it is recommended that MAXIMUM INITIAL ATTACK be applied. Waiting for the disaster to strike, then to dispatch is counterproductive and not cost effective.

Note that for the Aerial Support to be efficient and effective, it is ideal to send ground support teams and work in conjunction with the Incident Command Team. Aerial Support does not extinguish fires in isolation, it is part of a team effort.
